ISBN: 9780124115118

Price: \$79.95 / €57.95 / £48.99

Pub Date: November 2013

Hardcover / 290 pages

A great resource for researchers and professionals to understand the wide use of R in solving different problems in industry.

- ⇒ Helps data miners to learn to use R in their specific area of work and see how R can apply in different industries
- ⇒ Presents various case studies in real-world applications, which will help readers to apply the techniques in their work
- ⇒ Provides code examples and sample data for readers to easily learn the techniques by running the code by themselves

Data Mining Applications with R

Editors: Yanchang Zhao, Yonghua Cen

Publisher: Elsevier

Publish date: November 2013

ISBN: 978-0124115118

URL: <http://www.rdatamining.com/books/dmar>

This book presents 15 real-world applications on data mining with R. Each application is presented as one chapter, covering business background and problems, data extraction and exploration, data preprocessing, modeling, model evaluation, findings and model deployment. R code and data for the book will be provided soon at the RDataMining.com website, so that readers can easily learn the techniques by running the code themselves.

Table of Contents

Foreword, *Graham Williams*

Chapter 1 Power Grid Data Analysis with R and Hadoop, *Terence Critchlow, Ryan Hafen, Tara Gibson and Kerstin Kleese van Dam*

Chapter 2 Picturing Bayesian Classifiers: A Visual Data Mining Approach to Parameters Optimization, *Giorgio Maria Di Nunzio and Alessandro Sordani*

Chapter 3 Discovery of emergent issues and controversies in Anthropology using text mining, topic modeling and social network analysis of microblog content, *Ben Marwick*

Chapter 4 Text Mining and Network Analysis of Digital Libraries in R, *Eric Nguyen*

Chapter 5 Recommendation systems in R, *Saurabh Bhatnagar*

Chapter 6 Response Modeling in Direct Marketing: A Data Mining Based Approach for Target Selection, *Sadaf Hossein Javaheri, Mohammad Mehdi Sepehri and Babak Teimourpour*

Chapter 7 Caravan Insurance Policy Customer Profile Modeling with R Mining, *Mukesh Patel and Mudit Gupta*

Chapter 8 Selecting Best Features for Predicting Bank Loan Default, *Zahra Yazdani, Mohammad Mehdi Sepehri and Babak Teimourpour*

Chapter 9 A Choquet Integral Toolbox and its Application in Customer's Preference Analysis, *Huy Quan Vu, Gleb Beliakov and Gang Li*

Chapter 10 A Real-Time Property Value Index based on Web Data, *Fernando Tusell, Maria Blanca Palacios, María Jesús Bárcena and Patricia Menéndez*

Chapter 11 Predicting Seabed Hardness Using Random Forest in R, *Jin Li, Justy Siwabessy, Zhi Huang, Maggie Tran and Andrew Heap*

Chapter 12 Supervised classification of images, applied to plankton samples using R and zooimage, *Kevin Denis and Philippe Grosjean*

Chapter 13 Crime analyses using R, *Madhav Kumar, Anindya Sengupta and Shreyes Upadhyay*

Chapter 14 Football Mining with R, *Maurizio Carpita, Marco Sandri, Anna Simonetto and Paola Zuccolotto*

Chapter 15 Analyzing Internet DNS(SEC) Traffic with R for Resolving Platform Optimization, *Emmanuel Herbert, Daniel Migault, Stephane Senecal, Stanislas Francfort and Maryline Laurent*
